SUPPLY BULLETIN

VEHICULAR SETS AND AUTHORIZED INSTALLATIONS

Distribution authorized to the Department of Defense and DOD contractors only for official use or for administration or operational purposes. This determination was made on 7 July 1987. Other requests for this document will be referred to Commander, US Army Communications-Electronics Command and Fort Monmouth, ATTN: AMSEL-ME-P, Fort Monmouth, NJ 07703-5000.

DESTRUCTION NOTICE—Destroy by any method that will prevent disclosure of contents or reconstruction of the document.

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in back of this manual direct to: Commander, US Army Communications-Electronics Command and Fort Monmouth, ATTN: AMSEL-ME-MP, Fort Monmouth, New Jersey 07703-5000.

*This bulletin supersedes SB 11-131, 1 November 1986.

Section I. INTRODUCTION

1-1. PURPOSE

a. This bulletin provides guidance to using units on the methods to be used for authorizing, requisitioning, installing, replacing, or returning of excess components for radios and electronic equipment installed in vehicles.

b. A minisuppressor has been developed for some tracked vehicles where space limitation prevents the installation of the larger suppressor MX-7778A. All suppressors are included in the installation harness.

c. Further, this bulletin is a guide to using units in the preparation of requisitions for Communications Security Equipment (COMSEC). US Army CECOM has responsibility for the supply of COMSEC equipments for Army technical requirements. A large number of these equipments require installation kits in tactical vehicles or operational facilities which are also the responsibility of USACECOM. These kits are not listed in this bulletin but are listed in TM 11-5810-312-12-2 COMSEC EQPT TSEC/KY-57 Vol. 2, INSTALLATION KITS FOR WHEELED VEHICLES and must be requisitioned through Fort Huachuca, Arizona.

1-2. SCOPE

This bulletin is applicable to all using units that have a need for radios, COMSEC equipment, and electrical transient suppressors contained in TOE and TA authorized configurations by National Stock Numbers. This bulletin is not intended to be used as a basis of issue. SB 11-131 may be used as an authorization to requisition parts.

1-3. GENERAL

a. Selection of Appropriate Electronic Equipment. When radios are required for installation in vehicles, this bulletin will be used as a guide in the selection of the appropriate electronic and communication equipment.

(1) Sections II and III identify the types of vehicles in which radios may be mounted, the types of radios appropriate for these vehicles and required for installation harnesses and installation kits. These sections also provide guidance for authorization and requisitioning, and instruction for return and replacement of these equipments.

(2) Section IV contains basic units listings with National Stock Numbers (NSN's), technical manuals and suppressors.

(3) Section V contains component listings by National Stock Number (NSN) sequence and Procurement Parts List (PPL) of all accessory kits, installation kits and harnesses for installation and use with the radio when installed in combat, tactical, and nontactical vehicles and facilities.

(4) Section VI contains a cross-reference of Maintenance Kit (MK) numbers to National Stock Number (NSN).

(5) Section VII contains a cross-reference of Procurement Parts List (PPL) number to National Stock Number (NSN).

b. Audio Equipment.

(1) Combat vehicles (tracked). Tanks, Self-Propelled Weapons, Armored Personnel Carrier, or like vehicles.

(a) Audio equipment. The audio equipment (Armored vehicle crewman's DH-132 Helmet) is not supplied as a part of the installation harness or the accessory kit for specific tanks. The Helmet DH-132, in addition to the accessory kit, must be included in the authorization document by the document proponent to provide the necessary audio equipment.

(b) Requisition. The accessory kit and the Helmet DH-132, must be authorized and requisitioned separately.

(2) Tactical (wheeled) vehicles. The audio equipment is included as part of the installation kit and need not be requisitioned separately.

c. Stop-Gap Installations. When stop-gap installations are required for maneuvers, special projects, field tests and emergency situations, or when special installations are required and not listed in this bulletin, requests should be submitted to Commander, US Army Communications-Electronics Command and Fort Monmouth, ATTN: AMSEL-MMD-DW, Fort Monmouth, New Jersey 07703-5000.

d. Authorized Items. The following items must be authorized in the TOE/MTOE/TDA/MTDA and requisitioned separately in accordance with the authorized quantities to complete the radio configuration in the vehicles.

(1) Combat vehicles (tracked).

(a) Vehicle.

(b) Radio (basic unit).

(c) Accessory kit.

(d) Helmet DH-132.

(2) Tactical vehicles (wheeled).

(a) Vehicle.

(b) Radio (basic unit).

(c) Installation kit for vehicle radios.

1-4. DEFINITIONS

a. Radio Set - Basic Unit. The basic unit radio set consists of receiver-transmitters, receivers and antennas.

b. Installation Kit - Electronic Equipment. The installation kit is a combination of items required to install specific radio equipment in a given type of vehicle. Items are readily installed and do not become a part of the vehicle.

c. Accessory Kit - Electronic Equipment. The accessory kit is a combination of items required for use with a specific type of radio in a specific type of combat (tracked) vehicle. Items are readily installed and do not become a part of the vehicle.

d. General Purpose Installation Kits, Electronic Equipment. These kits are designed for use with administrative/commercial type vehicles, and radios in specific types of tactical vehicles (other than administrative/commercial).

e. Installation Harness - Electronic Equipment. The installation harness consists of radio mountings, cables, control units and brackets installed in combat (tracked) vehicles prior to issue, designed for use with specific radios in a specific vehicle. Components of the intercommunication system (AN/VIC-1) and the transient suppressors are installed as part of the harness, prior to issue of vehicles and remain in the vehicle along with all other components of the harness.

f. Nonstandard Installations. Stop-gap installation, nonstandard or unauthorized installations are required for maneuvers, special projects, field tests and emergency situations.

g. Suppressors, Electrical Transient. The suppressor prevents the high voltage electrical transients (spikes) in a direct current (DC) power electrical system from being applied to transistorized radios. The suppressor also prevents the transposed DC potential from being applied to the transistorized radios when the cable connection to the DC power source is inadvertently transposed; that is, the negative and positive leads are connected to the positive and negative terminals respectively of the DC power source. The suppressor is normally installed on a vehicle between the DC power electrical system and transistorized radios. Typical examples of transistorized radio sets that this suppressor may be used with are given below:

(1) Radio Sets AN/VRC-12 and AN/VRC-43 through AN/VRC-49.

(2) Radio Sets AN/GRC-106, AN/GRC-106A and associated configurations.

(3) Radio Sets AN/VRC-53, AN/VRC-64, AN/GRC-125 and AN/GRC-160.

NOTE

More than one radio set may be connected to the suppressor provided the total drain for the radios does not exceed 50 amperes (1,400 watts at 28 volts DC).

(a) The suppressors used in vehicles are the MX-7778/GRC, MX-7778A/GRC and the MK-2096/GRC.

(b) TM 11-5915-223-12 covers installation of the MX-7778/GRC.
TM 11-5915-224-14 covers installation of the MX-7778A/GRC.
SB 11-638 covers the minisuppressor.

h. General Information.

(1) FM Radio Sets AN/VRC-12 series. Radio Sets AN/VRC-43 through AN/VRC-49 are short-range vehicular and fixed radio sets designed for general tactical use. Combinations of basic components are used to form the eight standard configurations of the AN/VRC-12 series.

(2) AM Radio Sets AN/GRC-106 and AN/GRC-106A. The AN/GRC-106 and AN/GRC-106A are medium power, voice, CW and AM vehicular radio sets used within a field Army, and can be used for radio-teletypewriter operations.

(3) FM Radio Set AN/PRC-25. The AN/PRC-25 is a compact, low-power battery-operated FM radio receiver-transmitter (rcvr-xmtr) designed for use at platoon and company levels.

CONFIGURATIONS:

AN/PRC-25	Portable
AN/VRC-53	Vehicular
AN/GRC-125	Man-packed or vehicular, ground

(4) Radio Set AN/PRC-77. The AN/PRC-77 is a product-improved version of Radio Set AN/PRC-25, and provides portable voice communication for combat area units.

CONFIGURATIONS:

AN/PRC-77	Portable
AN/GRC-160	Man-packed or vehicular
AN/VRC-64	Vehicular

(5) Intercommunication Set AN/VIC-1(V). This configuration is used in all tracked vehicles (served by a crew) and some wheeled/amphibious vehicles. The AN/VIC-1(V) includes Amplifier, Audio Frequency AM-1780/VRC and 2, 3, or 4 each of Intercommunication Set Control C-2298/VRC. In tanks and similar vehicles, Intercommunication Set Controls C-2296/VRC and C-2297/VRC are provided. The proper quantities for the vehicle requirements are provided as part of the vehicle. The AN/VIC-1 components are now included as part of the vehicle and this nomenclature is no longer used in Army inventory and cannot be requisitioned as such.

1-6. LIST OF ABBREVIATIONS

The following is a list of abbreviations used in this bulletin.

ABBREVIATIONS	
AAA	Anti-Aircraft Artillery
AB	Antenna Base
ACCY	Accessory
ACE	Armored Combat Earthmover
AF	Audio Frequency
AM	Amplitude Modulation
AMDF	Army Master Date File
AMP	Amplifier
ASSY	Assembly
CAD	Cadmium
CECOM	Communications-Electronics Command
CFE	Contractor Furnished Equipment
COMSEC	Communications Security
CUCV	Commercial Utility Cargo Vehicle
DC	Direct Current
DIA	Diameter
DMD	Digital Message Device
EA	Each
ELEC	Electric or Electrical
FAASV	Field Artillery, Ammunition Supply Vehicle
FIST-V	Fire Support Team Vehicle
FM	Frequency Modulation
FREQ	Frequency
FSCM	Federal Supply Code for Manufacturers
FT	Feet or Foot
GFE	Government Furnished Equipment
GP	General Purpose
GRP, GP, GR	Group
H	Headset
HD	Head
HEMTT	Heavy Expanded Mobility Tactical Truck
HEX	Hexagon

ABBREVIATIONS

HMMWV	High Mobility Multi-Purpose Wheeled Vehicle
ID	Inside Diameter
IET	Internal/External Teeth
IN	Inch
IPS	Iron Pipe Size
LARC	Landing Amphibious Resupply Cargo
LAV	Light Armored Vehicle
LAV-AT	Light Armored Vehicle - Anti-Tank
LAV-L	Light Armored Vehicle - Logistics
LAV-M	Light Armored Vehicle - Medium
LAV-R	Light Armored Vehicle - Recovery
LG	Long
LIN	Line Item Number
LS	Loud Speaker
MAX	Maximum
MCRL	Master Cross-Reference List
MED	Medium
MIC	Microphone
MIL-STD	Military Standard
MIN	Minimum
MK	Maintenance Kit
MLRS	Multiple Launch Rocket System
MM	Millimeter
MODEM	Modulator-Demodulator
MRP	Materiel Return Program

TTY	Teletypewriter

Section II. GUIDANCE FOR SELECTION OF RADIOS AND INSTALLATION KITS

NOTES

1. For General Information use Chapter 1 of SB 700-20.
2. For line item numbers use Chapter 2 of SB 700-20.
3. For kits use Appendix A of SB 700-20.
4. For Cross Reference NSN to LIN use Appendix B of SB 700-20.
5. For NSN to LIN refer to Army Master Data File (AMDF).
6. For NSN or PPL or Kit Number refer to Master Cross-Reference List - 1 (MCRL-1) and Master Cross-Reference List - 2 (MCRL-2).

2-1. TYPES OF VEHICLES

a. The vehicles listed in Section III are appropriate for installation of radio sets. After determining the type of vehicle required, refer to paragraph 3-1 for further instructions in selecting the complete radio configuration.

b. Paragraphs 3-2 through 3-61 lists tactical (wheeled) and administrative commercial type vehicles and combat (tracked) vehicles. The following guidance is provided:

(1) Tactical (wheeled) and administrative/commercial type vehicles.

(a) The tactical (wheeled) and administrative/commercial type vehicles will be authorized separately in the authorization document (TOE/MTOE/TDA/MTDA) by the line item number(s) (LIN) shown in SB 700-20 less the basic radio and the installation kit. The consignee is responsible for requisitioning the communication equipment.

(b) When transferred or returned for overhaul, storage or to supply channels, the basic radio, and the installation kit will be removed from the vehicles installation for another appropriate vehicle or returned to supply channels if no longer required.

(2) Combat (tracked vehicles).

(a) Combat (tracked) vehicles will be authorized separately in the authorization documents (TOE/MTOE/TDA/MTDA) by the line item number(s) (LIN) shown in SB 700-20 less the basic radio, the accessory kit and the DH-132 Helmet. The installation harness is installed in the vehicles prior to issue and will not be requisitioned separately. All combat vehicles will have an AN/VIC-1(V) installed. The consignee is responsible for the requisitioning of all other communications equipment to complete the configuration.

(b) When transferred or returned for overhaul, storage or to supply channels, the radio basic unit and the accessory kit will be removed from the vehicle for installation in a like vehicle or returned to supply channels if not longer required.

(c) The installation harness or any component thereof may not be removed from the vehicle except as needed for replacement parts. The installation harness will remain in the vehicle when it is transferred or returned for overhaul.

2-2. ELECTRONIC EQUIPMENT CONFIGURATIONS

a. Basic Radio Set. Determine the nomenclature and type of basic radio to be mounted in a specific type of vehicle. Radios will be authorized separately in the authorization document by the line item number(s) (LIN) shown in SB 700-20. The radios shall be removed from the vehicle when the vehicle is transferred, returned for overhaul or placed in storage.

b. NSN for Basic Radio Set. The National Stock Numbers for the basic radio is identified in paragraph 4-1.

c. Installation Kit.

(1) The installation kit is required to install a given type of radio in a given type of tactical or administrative commercial type (wheeled) vehicle.

(2) IF required, the installation kit will be included in the appropriate authorization document TOE/MTOE/TDA/MTDA by the proponent of the document in accordance with the line item number(s) (LIN) as shown in SB 700-20.

(3) The installation kit must be requisitioned separately in accordance with the authorized quantity shown in the authorization document and the user will perform the installation in the field.

(4) The installation kit will be removed from the vehicle when the vehicle is transferred, returned for overhaul or placed in storage. The authorization document must be changed to delete this item when it is no longer required.

d. Accessory Kits.

(1) The accessory kits consist of items, such as audio accessories, installation instructions, technical manuals and other miscellaneous parts. Accessory kits are readily installed in and removed from combat (tracked) vehicles only.

(2) If required, this kit must be included in the appropriate authorization document (TOE/MTOE/TDA/MTDA) by the proponent of the document in accordance with the line item number(s) (LIN) as shown in SB 700-20.

(3) The accessory kit must be requisitioned separately in accordance with the authorized quantity shown in the authorization document and the user will perform the installation in the field.

(4) Initial issue of the accessory kit against an authorized allowance will require a funded requisition. When replacement of a defective component is required, the component only (as identified in Section V of this Supply Bulletin) will be requisitioned, citing appropriate funds.

(5) The accessory kit will be removed when the vehicle is transferred, returned for overhaul or placed in storage. The authorization documents must be changed to delete this item when it is no longer required.

2-3. SPECIAL TOOLS AND TEST EQUIPMENT

Special tools and test equipment are not required for the installation kits or accessory kits. The tools and test equipment required for maintenance of a specific configuration is listed in technical manuals (TM's) and repair parts and special tools lists (RPSTL's) covering individual radio sets.

2-4. REQUISITIONING

a. When vehicles with radio sets are to be turned in or transferred, the basic unit will be removed and reinstalled in a new replacement vehicle. Defective items which require replacement to complete installation, should be requisitioned separately as individual items.

b. Combat vehicles are normally received with an authorized installation harness installed, all combat vehicles will have an AN/VIC-1(V) installed prior to issue. Other vehicles are normally received without any radio configurations; in such cases, the radio basic units and installation kits should be requisitioned separately.

c. Requisitions for installation accessory kits will be submitted in accordance with this supply bulletin and forwarded to the US Army Communications-Electronics Command and Fort Monmouth, ATTN: AMSEL-MMG-C, Fort Monmouth, New Jersey 07703-5000. Requisitions for initial issue will include the following note: "Funds are cited and National Stock Numbers are in accordance with those in SB 11-131. The basis for this action is TOE# _____, or CTA# _____, or in accordance with pertinent Department of the Army directives (specified)."

d. For maneuvers, special projects, field tests, or other emergency situations, special arrangements may be made by letter to the Commander, US Army Communications-Electronics Command and Fort Monmouth, ATTN: AMSEL-MMD-DW, Fort Monmouth, New Jersey 07703-5000.

2-5. DISPOSITION OF UNUSED COMPONENTS

When various components of vehicular radios are installed for specific applications, unused components will be processed in accordance with AR 725-50, Chapter 7.

2-6. AUDIO EQUIPMENT

Installation harnesses for tanks do not contain audio equipment. Audio equipment is part of the DH-132 Helmet. The helmets are issued in regular or large sizes as listed in CTA 50-900, and are supplied by the Defense Logistics Agency.

2-7. SINGLE CHANNEL GROUND AIRBORNE RADIO SYSTEM

New FM radios will replace the AN/VRC-12 series radios with a slow hop Single Channel Ground Airborne Radio System referred to as (SINCGARS-V). The SINCGARS-V radio will require entirely new radio communication installation kits or harnesses replacing the present systems listed in the supply bulletin. The SINCGARS-V radio is designed as a jam resistant, secure means of tactical communications. Available in either manpack (portable) or vehicular mounted configurations, the SINCGARS-V will provide the Army with a reliable, easily maintained tactical radio system for command and control.

Section III. RADIO CONFIGURATION BY TYPE OF VEHICLE

3-1. VEHICLE NOMENCLATURE INDEX

Radio configurations for the following vehicle types are described in this section:

	Paragraph
Armored Reconnaissance, Airborne Assault Vehicle, M551	3-11
Armored Vehicle, Launcher, Bridge, M60A1/M48A5 (Hull)	3-23
Armored Vehicle, Launcher, Bridge, M60, M60A3 (Hull)	3-55
Carrier, Cargo, Amphibious, M76	3-7
Carrier, Cargo, Tracked, M548E1, M727	3-30
Carrier, Command Post, M577A1/A2	3-12
Carrier, Guided Missile, M901	3-31
Carrier, Missile, M474E2	3-10
Carrier, Mortar, M106A1/A2, M125A1/A2	3-8
Carrier, Personnel, Armored, M113A1/A2 (24V)	3-9
Combat, Engineer, Vehicle, Self-Propelled, Full-Tracked, M728	3-22
Earthmover, Armored, Combat, M9	3-32
Flame Thrower, Self-Propelled, Full-Tracked, M132A1	3-19
General Purpose Installation Kits	3-25
Gun, Self-Propelled, 175MM, M107, or Howitzer, Self-Propelled, 8-inch, 175MM, M110A2	3-17
Gun AA, Artillery, Self-Propelled, 20MM, M163	3-20
Gun, Self-Propelled, 40MM, M247 (Sgt. York)	3-33
Howitzer, Self-Propelled, 155MM, M109A2/A3	3-18
Lighter, Amphibious, Resupply, Cargo, MK-V (LARC-5)	3-27
Lighter, Amphibious, Resupply, Cargo, MK-XV (LARC-15)	3-28
Landing, Amphibious, Resupply, Cargo, LARC-LX (60)	3-29
Loader, Self-Propelled, Launcher, M270	3-34
Recovery Vehicle, Full-Tracked, Light Armored, M578A1	3-21
Recovery Vehicle, Full-Tracked, Medium M88A1	3-16
Recovery Vehicle, Maintenance, XM806E1	3-61
Tank, Combat, Full-Tracked, 90MM Gun M48A3, 105MM Gun M48A5	3-14
Tank, Combat, Full-Tracked, 105MM Gun, M1 (Abrams)	3-35
Tank, Combat, Full-Tracked, 120MM Gun, M1E1	3-46
Tank, Combat, Full-Tracked, 105MM Gun, M60A1	3-15
Tank, Combat, Full-Tracked, 105MM Gun, M60A1 Rise, M60A3	3-36
Transporter, Mobile Floating Assault Bridge Ferry	3-24
Truck, Cargo, 1-1/4 Ton, M561	3-5
Truck, Cargo, 2-1/2 Ton, 6x6, M34, M35, M135, M211	3-2
Truck, Dump, 5 Ton, 6x6, M51 or Truck Dump, 2-1/2 Ton, M342A2	3-6
Truck, Expansible Van, 5 Ton, M820	3-56
Truck, Heavy Expanded Mobility Tactical, M977	3-38
Truck, Heavy Expanded Mobility Tactical, M985	3-13
Truck, Tractor, 5 Ton, (Patriot), M818, M819	3-37
Truck, Utility, 1/4 Ton, M151A1 or M151A2	3-3
Truck, Utility, 1/4 Ton, 4x4, M151A1C, (with Xenon Searchlight, AN/GSS-14)	3-4
Truck, 1/4 Ton, 4x4, Ambulance, M886	3-60
Truck, 1-1/4 Ton, M882, M892	3-26
Truck, 5 Ton, M923, M925, M929, M930, M934, M939	3-57

3-1. VEHICLE NOMENCLATURE INDEX (Cont)

	Paragraph
Vehicle, Cavalry Fighting, M3 Bradley	3-41
Vehicle, Commercial, Utility, Cargo, M1008A1	3-50
Vehicle, Commercial, Utility, Cargo, M1009	3-51

AN/VRC-47 AN/GRC-106 or -106A	None required	None required	Book Plan Ref. No. 327 Book Plan Ref. No. 430

NOTES

1. Where "None required" is shown in the Installation Accessory Kit Column, the configuration has the required components in the individ- ual installation kits cited under single installations to complete the required combination installations.

2. When the AN/GRC-106 is installed in combination with any of the radios listed, two transient suppressors and two suppressor mounting assemblies are required per vehicle.

3-3. TRUCK, UTILITY, 1/4 TON, 4x4, M151A1, or M151A2

NOTES

1. For combination installations, one each Kit, Generator (6115-00-039-7733) should be requisitioned from TACOM.

2. When the AN/GRC-106 is installed in combination with any of the radios listed, two transient suppressors and two suppressor mounting assemblies are required per vehicle.

3. Intercommunication Set, AN/VIC-1(V) (5830-00-856-3273) components are included in the installation harness for the designated basic unit for radio sets AN/VRC-12 and -47 series. Therefore, there are no single installation kits for the individual radios.

3-8. CARRIER, MORTAR, M106A1/A2, M125A1/A2

COMBINATION INSTALLATIONS

Combination installations use more than one radio, accessory kit (when applicable), installation harness (for tracked vehicles), and are installed together.

Radio combination	Accessory kit Type no.	Accessory kit NSN	Installation harness NSN	Installation instructions
AN/GRC-125 or -160 or AN/VRC-46, -53 or -64 AN/VIC-1(V) (See note)	MK-1291/G	5820-00-494-6646	5820-00-493-7490	Book Plan Ref. No. 442 and 387

NOTE

Intercommunication Set AN/VIC-1(V) included in the installation harness for the designated basic unit for radio sets AN/GRC-125, -160 and AN/VRC-12 series. Therefore, there are no single installation kits for the individual radios.

NOTES

1. Intercommunication Set AN/VIC-1(V) components are included in the installation harness for the designated basic unit for radio sets AN/GRC-125, -160, AN/VRC-53, -64, and the AN/ VRC-12 series combinations.

2. When several AN/VRC-46's (curbside location) are used, no Intercommunication Set AN/ VIC-1(V) is required.

3. When the AN/GRC-106 is installed in combination with any of the radios listed, two transient suppressors and two suppressor mounting assemblies are required per vehicle.

3-10. CARRIER, MISSILE, M474E2

* TM 11-5820-401-12 has been superseded by TM 11-5820-401-10-1, TM 11-5820-401-20-1 which are used for wheeled vehicles, and TM 11-5820-401-10-2, TM 11-5820-401-20-2 which are used for tracked vehicles.

4-3. SUPPRESSORS

a. A minisuppressor has been developed for some tracked vehicles where space limitation prevents the installation of the larger MX-7778A/GRC. Refer to SB 11-638, installation and maintenance requirements of minisuppressors. The minisuppressor will be part of the installation harness when available; when not available it will be substituted with the MX-7778A (NSN 5915-00-431-6718) as part of the installation harness. The suppressor mounting assembly (NSN 5915-00-432-1458) for MX-7778A/GRC will be requisitioned separately.

b. All suppressors are included in the installation harness.

c. The suppressors used in vehicles are the MX-7778/GRC, MX-7778A/GRC and the MK-2096/GRC.

d. TM 11-5915-223-12 covers installation of the MX-7778/GRC. TM 11-5915-224-14 covers installation of the MX-7778A/GRC.

Section V. COMPONENTS LISTINGS BY NATIONAL STOCK NUMBER (NSN) SEQUENCE AND PROCUREMENT PARTS LIST (PPL)

NOTES

1. Installation kits (on wheeled-type vehicles) are the responsibility of the using units and are to be requisitioned and installed in the field.

2. Installation kits are required to install a specific radio in a given type of tactical (wheeled) vehicle. This includes kits (formerly identified as general purpose installation units) designed for use with and installing radios in administrative/commercial type vehicles. Items contained in kits are readily installed and do not become a permanent part of the vehicle.

3. Accessory kits must be requisitioned separately in accordance with the authorized quantity and the user will perform installation in the field.

4. Accessory kits are a combination of items, such as radio accessories, installation instructions, or technical manuals and other miscellaneous items. Kits are readily installed and removed and do not become a permanent part of the vehicle.

5. Installation/accessory kits are requisitioned by the using unit in accordance with the authorized quantity and will be installed in the field.

6. Installation/accessory kits are items required in some cases when more than one radio set is to be installed in a particular vehicle. Kits are readily installed and removed and do not become a permanent part of the vehicle.

7. The installation harness is not to be authorized as a separate item of issue and is not to be requisitioned separately.

8. The installation harness consists of mountings, cables, control units and brackets. It is installed as a part of the combat vehicle prior to issue.

9. The components of the installation harness will not be removed when the vehicle is transferred, returned for overhaul and/or storage, or returned to supply channels.

10. Minisuppressor will be part of the installation harness when available, when not available it will be substituted with the MX-7778A/GRC (NSN 5915-00-431-6718) as part of the installation harness. The suppressor mounting assembly for the MX-7778/A (NSN 5915-00-432-1458) will be requisitioned separately.

11. In combat vehicles, the installation harness is installed prior to issue. In some instances, combat vehicles being rebuilt did not require reinstallation of a AN/VIC-1(V) prior to issue to using units. These vehicles must have a AN/VIC-1(V) reinstalled even when the using unit does not require reinstallation of a AN/VIC-1(V). The recipient requisitions the accessory kits and basic units.

12. The Installation Instructions/Technical Manuals and Installation Drawings are Components of the Installation Kits and Accessory Kits. They will be authorized separately and need not be requisitioned separately.

13. These Installation Instructions/Technical Manuals are expendable; if lost of destroyed, requisition as required.

14. These Installation Instructions/Technical Manuals contain technical data and drawings and are included as a component of the installation kit for tactical (wheeled) vehicles and the accessory kit for combat vehicles.

15. A complete conversion from installation instructions to the technical manual concept has not been completed; therefore, consult DA Pam 25-30 for current listings.

16. Vehicles should not contain more than one AN/VIC-1(V). Combat vehicles must contain one AN/VIC-1(V) prior to issue.

17. All required transient suppressors are included in the installation harness unless otherwise indicated.

18. To requisition parts when the NSN is not listed, use the Federal Supply Code for Manufacturer (FSCM) and the part number.

NOTES

1. Lamp per NSN 6240-00-143-7418 is colored by dipping in a 50% Red - 50% Clear mixture of "Trail Flyte Baking Finish - Bright Red", Company No. 297294 manufactured by Trail Chemical Corp., El Monte, California, or equal. Bake at 300°F for approximately 20 minutes.

2. Delete this item when security equipment is not authorized.

3. Dry Batteries are not packaged with subject equipment and are to be requisitioned in accordance with instruction contained in Supply Bulletin SB 11-6, Subject "Dry Battery Supply Data".

4. When Blackout Operation is required, requisition Blackout Kit per PPL List #4977.

NOTES

Most of the components of the LAV-25A installation kit will be provided by the contractor (CFE). CECOM will provide as government furnished equipment (GFE) 1 each, AM-1780/VRC amplifier, audio frequency, NSN 5820-00-892-3342; 2 each, C-2298A/VRC, control intercommunication set, NSN 5820-00-892-3339; and 1 each C-2297A/VRC, control intercommunication set, NSN 5820-00-892-3338.

PPL's are listed for M113A1/A2, but are usable for light armored vehicle, LAV-25A.

NOTES

1. Place these items in a cloth bag.

2. Used with but not a component part of kit.

3. Power supply, PP-4763A/GRC (NSN: 5820-00-13-9768) may be used in lieu of PP-1104/G.

4. Use power Accessory KIt, MK-1821/GSG-10(V) only if 3 phase, 208V, 60 Hertz Generator is not available. If vehicle is so equipped, return above power kit to supply channels.

5. If no National Stock Number (NSN) is listed in NSN column, the part can be requisitioned by using the Federal Supply Code for Manufacturers (FSCM) and the part number.

Section VI. CROSS-REFERENCE MAINTENANCE KIT (MK) NUMBER TO NATIONAL STOCK NUMBER (NSN)

NOTES

1. Table 6-1 contains cross-reference numbers to NSN's.

2. A kit may have been superseded to a new kit number, the old number has been retained and refers the reader to the new type number.

3. In reference to the installation harnesses, they may be identified by National Stock Number in Section VII.

Table 6-1. Cross-Reference Maintenance Kit (MK) Number to National Stock Number (NSN)

Section VII. CROSS-REFERENCE PROCUREMENT PARTS LIST (PPL) TO NATIONAL STOCK NUMBER (NSN)

NOTES

1. Table 7-1 contains PPL numbers cross-referenced to NSN for currently used installation kits, accessory kits and installation harnesses.

2. Where a PPL has been superseded to a new PPL number, the old number is retained and refers to the new number.

3. In cases where an NSN has not been assigned proper identification of the PPL, it may be determined on the previous issue of the PPL.

Table 7-1. Cross-Reference Procurement Parts List (PPL) to National Stock Number (NSN)

IN THIS SPACE TELL WHAT IS WRONG AND WHAT SHOULD BE DONE ABOUT IT:

Recommend that the installation antenna alignment procedure be changed throughout to specify a 2^{o} IFF antenna lag rather than 1^{o}.

REASON: Experience has shown that with only a 1^{o} lag, the antenna servo system is too sensitive to wind gusting in excess of 25 knots, and has a tendency to rapidly accelerate and decelerate as it hunts, causing strain to the drive train. Hunting is minimized by adjusting the lag to 2^{o} without degradation of operation.

Item 5, Function column. Change "2 db" to "3db."

REASON: The adjustment procedure for the TRANS POWER FAULT indicator calls for a 3 db (500 watts) adjustment to light the TRANS POWER FAULT indicator.

Add new step f.1 to read, "Replace cover plate removed in step e.1, above."

REASON: To replace the cover plate.

Zone C 3. On J1-2, change "+24 VDC to "+5 VDC."

REASON: This is the output line of the 5 VDC power supply. +24 VDC is the input voltage.
